Index 1969

Subjects

Acid–base function, A fresh start with, 159

Ammonia, The use of natural gas in place of naphtha in the manufacture of, 99

Analysis, Differential thermal, 171

Analysis in undergraduate courses, The place of qualitative inorganic, 221

Arts, Chemistry at large among the, 167

Attainment in education, Measuring, 84

Audio-visual equipment, 149

Audio-visual reviews, 156

Batteries old and new, 120

Biochemistry and food science (Progress report), 101

Books, 30, 66, 116, 157, 189, 235

Carcinogens at school, 163

Careers, Interesting parents in science, 154

Chatelierian infelicity, A, 9, 76

Chemical formula for negative electricity, A, 118

Chemical kinetics and equilibrium at school level, 217

Chemical stamps, 61, 184

Chemistry at large among the arts, 167

Chemistry experiments on a low budget, Introductory, 57

Chemistry in the service of man, 186

Chemistry, Measuring attainment of educational objectives in, 78

Chemistry of some vanadium(II) compounds, The, 24

Chemistry teachers' group, A local, 155

Chemistry, The new look of, 119

Complexes, Molecular, 175

Computerized marking of multiple-choice tests, 81

Configurational stability, 37, 76

Courses and conferences, 29, 64, 114, 153, 185, 233

D-Block elements at pre-university level, 223

Determination of molecular weights by elevation of boiling points, 53

Differential thermal analysis, 171

Education, Measuring attainment in, 84

Educational objectives in chemistry, Measuring attainment of, 78

Electron energy levels in free atoms and chemical properties, 10

Electrons, The tendency to attract or lose, 40

Electron symbol, 38

Equilibrium at school level, Chemical kinetics and, 217

Equipment, New apparatus and, 27, 62, 111, 148, 187, 232

Equivalents, In praise of, 162

Evaluation of examination questions, The, 95

EVR–the moving-picture book, 127

Examination questions, The evaluation of, 95

Examinations system, Increasing the efficiency of the university, 88

Examinations—what next? 77

Experiments with quinones, 13

Films, 28, 113, 152.

Foxed? 162

Food science, Biochemistry and (Progress report), 101

Forum for chemistry teachers, 185

Future trends in science education, 133

Grignard at school level, 75

How to get more science teachers, 65

Increasing the efficiency of the university examinations system, 88

Information sources for teachers, 36

Inorganic chemistry (Progress report), 179

Inorganic syntheses, Some whys and wherefores in, 137

In-service training, 74, 118

Interesting parents in science careers, 154

Introducing spectroscopy to schools, 164

Introduction to the organometallic chemistry of the main group elements, 105

Introductory chemistry experiments on a low budget, 57

Ir spectroscopic investigation of the oxidation of polynuclear hydrocarbons, 56

Kinetics and equilibrium at school level, Chemical, 217

Lewis acid–base concept in sixth-form chemistry teaching, The, 40

Macromolecules, Molecular models for, 2

Main group elements, Introduction to the organometallic chemistry of the, 105

Measuring attainment of educational objectives in chemistry, 78

Measuring attainment in education, 84

Mendeleev or Newlands? 161

Models for macromolecules, Molecular, 2

Molecular complexes, 175

Molecular models for macromolecules, 2

Molecular weights by elevation of boiling points, Determination of, 53

Multiple-choice tests, Computerized marking of, 81

Natural gas in place of naphtha in the manufacture of ammonia, The use of, 99

New apparatus and equipment, 27, 62, 111, 148, 187, 232

New look of chemistry, The, 119

Nuffield chemistry, 37

Nuffield chemistry at A-level, Introduction, 200; Special studies, 202; Examinations, 205;

Structure 208; Energy, equilibria and rates, 210; Technology, 214

Organic chemistry (Progress report), 142

Organic chemistry, The use of models with programmed learning in, 130

Organometallic chemistry of the main group elements, Introduction to the, 105

Oxidation of polynuclear hydrocarbons, Ir spectroscopic investigation of the, 56

Periodic system, The, 39

Pharmaceutical careers, 110

Physical chemistry (Progress report), 49

Practicals for sixth forms, Programmed, 21

Programmed learning in organic chemistry, The use of models with, 130

Programmed practicals for sixth forms, 21

Progress reports, 5, 49, 101, 143, 179

Qualitative inorganic analysis in undergraduate courses, The place of, 221

Queries in chemistry, 73, 159, 238

Quinones, Experiments with, 13

Readers' forum, 37, 74, 118, 159, 198

RIC and teachers' pay, The, 1, 75

RIC summer schools, 37

Safety in the lab, 142

Sandwich courses, 76, 118

Science education, Future trends in, 133

Science research in schools, 29

Science teachers, How to get more, 65

Short courses in chemistry for biology teachers, 154

Some whys and wherefores in inorganic syntheses, 137

Specialization or generalism? 64

Spectroscopy to schools, Introducing, 164

Stamps, Chemical, 61, 184

Students attend Australian summer school, 186

Swing (away from science), The, 198

Tendency to attract or lose electrons, The, 40

Theoretical chemistry (Progress report), 5

Use of models with programmed learning in organic chemistry, The, 130

Use of natural gas in place of naphtha in the manufacture of ammonia, The 99

Vanadium(II) compounds, The chemistry of some, 24

Venn diagrams in chemistry, 19
